Profile

I am a web developer with over 5 years of experience creating digital solutions and collaborating on projects across various industries.

I have worked with international clients and teams, adapting to different work environments and methodologies.

I specialize in web development using technologies such as HTML, CSS, JavaScript, and WordPress + Elementor, and I am continuously training in modern stacks to become a Full Stack Developer, working with React, Next.js, and Node.js / Express.

I am characterized by being an autonomous, proactive, and results-oriented professional, highly motivated to keep learning and adding value to every project I take part in.

Experience

Novaz S.A — Web Developer (Remote) | April 2024 – October 2025 (1 year & 6 months)

In my role as Web Developer at Novaz S.A. (Remote), I participated in the creation of more than 100 websites for clients from different countries.

I collaborated with the design team to transform Figma mockups into functional websites using WordPress and Elementor Pro, implementing technologies such as HTML, CSS, JavaScript, and PHP for custom functions and plugins.

Additionally, I developed custom plugins, optimized site performance, and provided technical maintenance for various companies.

Freelance — Web & Software Developer (Remote) | January 2018 – Present

Development of customized websites and software solutions tailored to each client's needs.

I work with technologies such as WordPress, WooCommerce, HTML, CSS, and JavaScript, also providing consulting and complete web design services.

I have participated in the creation of custom modules and applications using Java and JavaScript, and I have also done graphic design, illustrations, logos, and branding for businesses.

El Diario de la República — Full Stack Developer | San Luis, Argentina | oct. 2021 - jun. 2024 (2 years & 9 months)

As a Full Stack Developer, I developed websites for new digital products using the most suitable technologies for each project.

I worked on platforms such as ClasificadosED, FM Radio Lafinur, and La Gráfica San Luis, covering both frontend and backend development.

I implemented solutions using HTML, CSS, JavaScript, React, Node.js, and WordPress, ensuring optimized, scalable websites aligned with company goals.
